PROFILE

M.Sc. graduate in Artificial Intelligence with hands-on experience in Python, data analysis, and basic machine learning. Currently strengthening software engineering skills in C, Linux, and Git at 42 Heilbronn. Motivated to apply practical problem-solving skills in a working student role in Machine Learning, Data Science, or Software Development.

TECHNICAL SKILLS

- Python (Data Analysis, Machine Learning basics)
- OpenCV (Image Processing, Feature Extraction)
- Pandas, NumPy, Scikit-learn
- C (42 Program), Git, GitHub, Linux
- Problem solving and debugging

PROJECTS

- OpenCV Image Processing Project

Designed and implemented an image processing pipeline including grayscale conversion, thresholding, and edge detection. Focused on extracting visual features and understanding image data transformations.

- SpaceX Prediction Project

Developed a machine learning model using structured real-world data to predict launch outcomes. Performed data cleaning, feature selection, and basic model evaluation using Python libraries.

- Libft (C Programming – 42)

Built a custom C library by re-implementing core standard functions, focusing on memory management, pointers, and efficient low-level programming concepts.

EDUCATION

42 Heilbronn – Software Engineering (2025 – Present)

M.Sc. Artificial Intelligence – Amirkabir University

B.Sc. Physics – University of Tehran

EXPERIENCE

- Programmer – Amiri & Daraee Company

2013 – 2021

Worked on programming and data-related tasks, applying Python and analytical thinking to solve technical problems.

- Robotics & Physics Consultant

2007 – 2013

Provided guidance on robotics and physics-related projects, supporting problem-solving and technical development.

LANGUAGES

German (B2) | English (Fluent) | Persian (Native)

STRENGTHS

Analytical Thinking | Problem Solving | Teamwork | Fast Learning | Initiative
